QYOBO

Working Student in Data Annotation & Strategy (m/f/d)

Join QYOBO—a fast-growing tech startup revolutionizing the pharma industry.

Are you passionate about startups, data, and strategy, and eager to make a real impact? As a Working Student in Data Annotation & Strategy, you'll play a crucial role in enhancing global drug and chemical supply transparency. Dive deep into pharma through data annotation and support our leadership with ad-hoc projects, research, and presentations that shape the industry's future.

What we offer:
- Impactful Work: Contribute directly to projects shaping the future of the pharmaceutical and chemical supply chain.
- Professional Growth: Receive extensive training and mentorship from experienced professionals.
- Dynamic Culture & Workplace: Join an inclusive, flat-structured team in our beautiful office at Munich's Marienplatz, with unlimited coffee, snacks, and regular team events.
- Career Opportunities: Potential for future full-time positions within the company after graduation.

What you'll bring:
Required Qualifications
- Educational Background: Enrolled in graduate studies in Economics, Business Administration, Marketing, Computer Science, Engineering, Physics, or related fields.
- Analytical & Research Skills: Proficient in analyzing complex data (e.g., Excel), conducting research, and creating compelling presentations (e.g., PowerPoint).
- Self-Motivated Team Player: Reliable, able to work independently with minimal supervision, and effective in a collaborative environment.
- Excellent Communication: Fluent in English, both written and verbal.

Preferred Qualifications
- Technical Skills: Familiarity with data analysis tools (e.g., Python, Pandas) is a plus.
- Language Proficiency: German language skills are advantageous.
- Adaptability: Eager to learn and thrive in a fast-paced startup environment.
- Project Management: Basic understanding of project management principles.

What you'll do:
- Data Annotation for Benchmarking: Create high-quality ground truth data by annotating pharmaceutical datasets to benchmark AI workflows and support machine learning features.
- Strategic Support: Assist leadership with ad-hoc projects, conduct research, create presentations, and handle tasks essential for strategic decisions.
- Research & Insights: Collaborate with teams to deliver data-driven insights that inform business strategies.

About QYOBO:
We are a Munich-based startup dedicated to bringing big data solutions to the pharmaceutical industry. Our interactive dashboards empower business professionals to derive actionable insights, navigating a complex and dynamic market with ease. At QYOBO, you'll have everything you need to make a lasting impact. We value innovation, collaboration, and the unique perspectives each team member brings.
